

Nursery

citrus, avocado specialists

AgriExchange boasts one of the largest citrus and avocado nurseries in Australia. Management and staff have more than 40 years' experience in the production of nursery trees and apply world best production practices.

Expert advice is offered to our valued customers on matching variety and rootstock combinations and spacing for different soil types. The nursery utilises certified budwood and seed and has developed a reputation for supplying high quality, disease free nursery trees.

Nursery staff pride themselves in providing reliable, consistent supply to ensure new and re-developments stay on schedule.

Growers receive regular updates on the progress of their orders.

Our after sales service features follow up calls to monitor the trees after planting in the field. The nursery works closely with other divisions within the company to provide growers with specialised resources in irrigation, soil moisture monitoring, entomology, land development and soil surveying.

For Use With:	Oranges	Oranges	Oranges	Lemons only	Oranges	Oranges
	Grapefruit	Grapefruit	Grapefruit		Lemons	Lemons
	Mandarins	Mandarins (except imperials)	Mandarins		Grapefruit	Grapefruit
	Lemons				Mandarins	
		Lemons				

industry leader

Nursery staff at AgriExchange are committed to embracing the latest techniques and technology to produce high quality, disease free nursery trees in the shortest possible time frame.

As a member of the Nursery and Garden Industry Association of South Australia (NGISA) the nursery is playing a leading role in developing accreditation standards which will set benchmarks in plant quality and occupational health and safety across the state.

The nursery has already implemented its own Integrated Pest Management program and utilises a highly sophisticated fertigation and drip irrigation system designed to provide each seedling and tree with the plant's specific nutrition and water needs.

The nursery has expanded into the propagation of citrus and stone fruit trees to meet the needs of the wholesale garden sector. Native trees, which are suitable for windbreaks and salt affected soils, can be propagated on request.
