

# EnviroSCAN Plus

Web enabled,  
wireless soil water  
monitoring

## What is it?

EnviroSCAN Plus combines the proven sensor technology of the world's most used soil monitoring solution, EnviroSCAN, with the latest in web enabled, wireless communication.

EnviroSCAN Plus also has the ability to continuously track fertiliser and salinity data through the use of the TriSCAN sensor.

EnviroSCAN Plus utilises GPRS Communication to send soil water, fertiliser and salinity data from the probe to the user's personal computer via the internet.

## EnviroSCAN Plus difference

### Probe

- Utilises existing EnviroSCAN and TriSCAN sensors, tubes and probe rod allowing for easy upgrade
- New EnviroSCAN Plus interface replacing standard 5-wire board
- Available in both EasyAG and EnviroSMART probes

### Data Transmission Unit (DTU)

- EnviroSCAN Plus DTU is located in close proximity to the probe
- EnviroSCAN Plus Probe is connected to the DTU via a few metres of cable
- EnviroSCAN Plus DTU comprises:
  - GPRS Communication Module with antenna
  - 12-volt battery, with charger

### Web enabled, wireless communication

- No need for in-field logging system
- Direct communication from EnviroSCAN Plus probe to the internet
- Seamless download from the internet into Irrimax software
